How to Boot into Safe Mode On Windows 10

We sometimes have to enter

- * Safe Mode
- * Safe Mode with Networking
- * Safe Mode with Command Prompt

On startup, we used to tap the F8 or F5 key to enter safe mode, but this has all changed for Windows 10. For those who would like to add the Safe Mode options to the start menu, then this video is for you.

Its a simple process and can help people enter safe mode a lot easier and with one click.

How To Add Safe Mode Option To Windows 10 Boot Menu

How to add Safe Mode Minimal

`bcdedit /copy {current} /d "Windows 10 Safe Mode"`

How to add Safe Mode with Command Prompt
bcdedit /copy {current} /d "Windows 10 Safe Mode
(Command Prompt)"

How to add Safe Mode with Networking
